

# TRANSFORMING OUTDOOR SPACES INTO LUXURY

FREEDOM TO DESIGN WITHOUT LIMITS

Simpaverde S.L. provides water-saving solutions that make green and recreational spaces greener, cooler and more climate-resilient

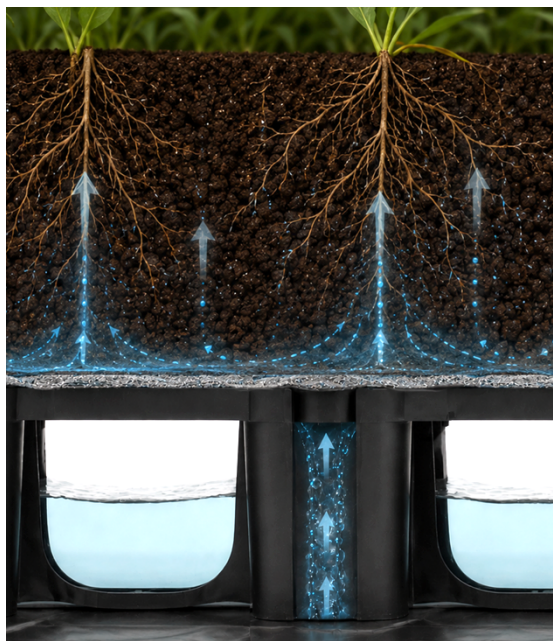

## CAPILLARY ROOTZONE IRRIGATION

An irrigation system delivering water from underneath the substrate – directly to plant roots – **only what plants need, when they need it.**

## THE NEXT STANDARD IN CLIMATE-RESILIENT GARDENS

Healthier plants through stable water availability. **Allows for greater plant diversity, creating richer planting designs.** Future-proof gardens that are greener, more resilient and visual richer.

## COMPARED TO TRADITIONAL IRRIGATION

- > **50%+ water savings**
- > 75% less system maintenance
- > 30% less green maintenance
- > **25%+ more green coverage**
- > Lasts 5x longer
- > 80% less erosion
- > 70% less mosquitoes

# THE WATER FOUNDATION FOR GARDENS

LUXURY BEGINS HERE

- > Stores 80 – 140 L/m<sup>2</sup> of rainwater
- > Water is gradually (re)used by plants
- > Invisible in the garden design
- > Modular and scalable system

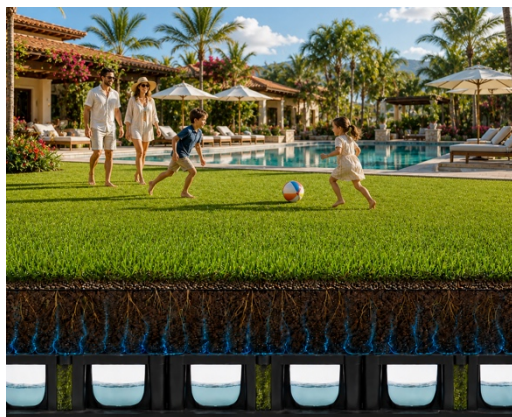

## APPLICABLE TO ALL GREEN ELEMENTS

- > Planting beds & borders
- > Lawns and groundcover
- > Trees and shrubs
- > Rooftop gardens & terraces
- > Weight-sensitive environments
- > Compact spaces
- > Playgrounds

We support the integration of the system into your designs and assist with the (initial) installation to ensure the best results
